NOTICE OF APPLICATION ACCEPTANCE - PUBLIC INFORMATION AND ENVIRONMENTAL ANALYSIS SCOPING MEETINGS

Issued: July 20, 2015

In the Matter of the Applications of Enbridge Energy, Limited Partnership for a Certificate of Need and a Pipeline Routing Permit for the Line 3 Pipeline Replacement Project in Minnesota from the North Dakota Border to the Wisconsin Border

Public Utilities Commission (PUC) Docket Numbers: PL-9/CN-14-916 – Certificate of Need
PL-9/PPL-15-137 – Route Permit

Project Description

Enbridge Energy, Limited Partnership (Enbridge) proposes to:

- Replace 282 miles of its existing 34-inch diameter Line 3 pipeline with 337 miles of 36-inch diameter pipeline
- Follow the existing Line 3 from the Minnesota-North Dakota border to Clearbrook
- Follow the same route proposed for the Sandpiper pipeline (PUC Docket Number 13-474) from Clearbrook to the Minnesota-Wisconsin border
- Permanently deactivate the existing Line 3 in-place after the replacement pipeline is in service
- Upgrade pump stations at Clearbrook, Donaldson, Plummer, and Viking
- Build new pump stations at Backus, Cromwell, Palisade, and Two Inlets

The proposed project is located in Aitkin, Carlton, Cass, Clearwater, Crow Wing, Hubbard, Kittson, Marshall, Pennington, Polk, Red Lake, and Wadena counties.

Enbridge states the project is needed to address safety and integrity issues associated with the existing Line 3 pipeline.

Meeting Information

- Each meeting starts on time.
- Arrive a few minutes early so you have time to sign in, pick up materials, and find a seat.
- State agency staff members run the meetings.
- Public Utilities Commission, Department of Commerce, and Enbridge staff will be available to answer questions about the permitting process and the project.
- You may add verbal comments, written comments, or both into the record.
- The Department of Commerce uses comments received at the meeting and during the comment period to develop the environmental analysis for this project.

Submit Comments, Alternative Routes, Route Segments, Project Alternatives

Topics Open for Public Comment:

- Please focus your comments on information that will help answer the following questions.
- In your comments, please state which question(s) you are addressing.
 1. What human and environmental impacts should be studied in the environmental analysis?
 2. Are there any specific methods to address these impacts that should be studied in the environmental analysis?
 3. Are there any alternative routes or route segments that should be considered? (Related to the *Route Permit*)

If proposing an alternative route or route segment, consider the following:

- Does the alternative address an unavoidable impact?
 - Does the alternative offer significant environmental or socioeconomic benefits compared to the proposed project?
 - Is the alternative feasible and prudent?
 - Does the alternative meet the described need and purpose for the project?
4. Are there any alternatives to the project that should be considered? (Related to the *Certificate of Need*)

If proposing an alternative to the project, consider the following:

- Project size – can a smaller or larger sized project better meet the decision criteria?
- Project type – can a different method (for example, existing pipeline, rail, or truck) meet the need?
- Project timing – is the project needed now or in the future?
- Is the alternative feasible and prudent?
- Does the alternative meet the described need and purpose for the project?

Comment Period Comments accepted through September 30, 2015

Please include the PUC Docket Numbers (*above*) in all communications.

Process Information

Before the project can be built, the Public Utilities Commission (Commission) must approve both a certificate of need and a pipeline route permit.

The certificate of need process determines the size, type and timing of the proposed pipeline and whether there is a better alternative for meeting Enbridge's stated need.

The pipeline route permit process designates the route for the pipeline and associated facilities and conditions for right-of-way preparation, construction, clean-up, and restoration. This process studies alternative routes and route segments for the pipeline.

At its July 1, 2015 meeting, the Commission determined Enbridge's certificate of need and pipeline route permit applications are complete. This means the company submitted all the information required to begin the review process. The Commission's decision-making process takes about twelve to fifteen months.

Department of Commerce Energy Environmental Review and Analysis staff prepares an environmental analysis for the certificate of need and a comparative environmental analysis for the route permit.

After the environmental review in each proceeding is completed, an Administrative Law Judge (ALJ) holds public hearings. You may speak at the hearings, ask questions, and submit written comments about the project.

After the public hearings, the Commission reviews all the information in the record, including written comments and comments received at the public hearings. The Commission's final decisions on the Line 3 certificate of need and route permit are expected by October 2016.

Eminent Domain: If issued a route permit by the Commission, Enbridge may use the power of eminent domain to take land for this project.

Any new easement or right-of-way agreements reached between Enbridge and landowners before a pipeline route permit is issued will not be considered in the Commission's final decision.
